acoustic isol.

Description

In the green surroundings of Pepingen, this ready-to-move-in and energy-efficient home is being built on a naturally sloping plot. The result? A raised terrace on stilts with an impressive view over the surrounding fields – enjoy peace and open space every single day. This compact and smart family home has it all: three bedrooms, an open living space with plenty of natural light, a fully equipped ATAG kitchen, a modern bathroom with walk-in shower and towel heater, a practical laundry room, and two toilets. Two private parking spaces are provided right in front of the house. Expected completion: September 2025. As a BEN home (nearly zero-energy building), it comes with top-notch technical features: – High-efficiency glazing (U-value 1.0) – Ventilation system D – 200-liter heat pump boiler – 13 solar panels of 410 Wp with inverter – Air-to-air heat pump (3.5 kW) for the living area and kitchen – Two additional air-to-air heat pumps upstairs (1 in the master bedroom, 1 in the hallway for the children’s rooms) This ensures a comfortable indoor climate both in summer and winter, resulting in an A-level EPC score. With its smart layout and energy-saving technologies, this is an ideal family home, first-time purchase, or future-proof investment. The home will be fully finished under the 21% VAT regime. The photos shown are of a previously completed home.
